MTH-100 Intermediate Algebra (2 Credits)

A study of the real number system, linear equations and inequalities, and systems of linear equations and inequalities intended to better prepare the student for higher levels of mathematics. May not be taken after credit is granted for MTH-101 or where except for change of grade. 2 Semester Hours.

Requisites:
Take MTH-100
Locations:
Main Campus, Acadiandale - College Consortium

MTH-105 College Algebra (2 Credits)

A study of exponential, logarithmic, trigonometric, and quadratic equations intended to better prepare the student for higher levels of mathematics. May not be taken after credit is granted for MTH-180 or where except for change of grade. Prerequisite: MTH-100 with a grade of C- or higher, or satisfactory math placement 2 Semester Hours.

Requisites:
Take MTH-105 with a minimum grade of C- or math placement of Level 5 . Must be completed prior to taking this course.
Locations:
Main Campus, Acadiandale - College Consortium

MTH-119 Quantitative Literacy (4 Credits)

This course will provide and enhance students' skills in mathematical methods, reasoning, and problem solving. Topics included are from an array of real-world applicable mathematics including data analysis, mathematical modeling, number sense, statistics, and graph theory. Students are expected to learn and use these concepts and procedures as well as be able to draw conclusions and explain their reasoning. 4 Semester Hours.

Requisites:
None
Locations:
Main Campus, Acadiandale - College Consortium

MTH-123 Elementary Statistics (4 Credits)

A study of measures useful in going concise descriptions of masses of numerical data. A brief study of probability theory provides the basis for an introduction to methods of testing hypotheses and estimating parameters. Topics include descriptive statistics, probability, discrete and continuous probability distributions, statistical inference and correlation and regression analysis. Prerequisite: MTH-100 with a grade of C- or higher, or satisfactory math placement. 4 Semester Hours.

Requisites:
Take MTH-123 with a minimum grade of C- or math placement of Level 7 . Must be completed prior to taking this course.

MTH-205 Intro to Probability and Stats (2 Credits)

This course provides the theory and practice of the use of probability and statistics in engineering and science. Topics include descriptive statistics, probability, discrete and continuous probability distributions, point estimation, confidence intervals, hypothesis tests, and linear regression. Prerequisite: MTH-142 2 Semester Hours.

Requisites:
Take MTH-205 with a minimum grade of C- . Must be completed prior to taking this course.

MTH-206 Probability and Stats Engineer (4 Credits)

This course provides the theory and practice of the use of probability and statistics in engineering and science. Topics include descriptive statistics, probability, discrete and continuous probability distributions, point estimation, confidence intervals, hypothesis tests, and linear regression. Prerequisite: MTH-142 4 Semester Hours. Recommended prerequisite: knowledge of spreadsheet. No applied group project is required in which experimental design, data collection, and computer analysis of data are utilized. Prerequisite: MTH-142 4 Semester Hours.

Requisites:
Take MTH-206 with a minimum grade of C- . Must be completed prior to taking this course.

MTH-223 Intermediate Statistics (4 Credits)

This second course in statistics will emphasize statistical inference and applications in various fields, modeling, and visualization for real data sets. Topics include multiple regression with diagnostics, one-way and non-way analysis of variance, and analysis of categorical data. Prerequisite: MTH-123 or MTH-205 or permission of instructor for students who have had exposure to statistical hypothesis testing. 4 Semester Hours.

Requisites:
Take MTH-223 or MTH-205 . Must be completed prior to taking this course.

MTH-301 Advanced Math Number Theory (4 Credits)

A study of the fundamental properties of the integers and their applications in cryptography and computer science. Topics include the language of sets and functions and methods of proof, as well as selected topics from number theory including the Euclidean Algorithm and congruences. Prerequisite: MTH-142 4 Semester Hours.

Requisites:
Take MTH-301 . Must be completed prior to taking this course.

MTH-333 Linear Algebra Diff Equation (4 Credits)

A study of matrices and determinants, vector spaces, linear transformations, and differential equations. Some of the topics include systems of linear equations, matrices and determinants, vector spaces, eigenvalues and eigenvectors, linear transformations, applications of differential equations, solutions of differential equations, and applications. Prerequisite: MTH-142 with a grade of C- or better. MTH-333 cannot be taken if credit has already been received for MTH-331. 4 Semester Hours.

Requisites:
Take MTH-333 with a minimum grade of C- . Must be completed prior to taking this course.

MTH-351 Numerical Analysis (2 Credits)

A study of numerical integration and the numerical solution of differential equations, numerical methods of linear algebra, matrix inversion and the solving for real roots of equations. Oriented toward computer applications. Prerequisite: MTH-142 and knowledge of computer programming. Recommended prerequisite: MTH-333 or MTH-241 2 Semester Hours. Recommended prerequisite: knowledge of computer programming course such as CSC-200 is recommended. Recommended prerequisite is taking this course, but is not required.
