MTH-100 Intermediate Algebra (2 Credits)

A study of the real number system, linear equations and inequalities, and systems of linear equations and inequalities intended to better prepare the student for higher levels of mathematics. May not be taken after credit is granted for MTH 105 or above except for change of grade. 2 Semester Hours.

Requisites:
None
Locations:
Main Campus

2022 Spring

MTH-100-01
Intermediate Algebra
Runs from 1/10/2022 - 3/3/2022

Seats	Times	Locations	Instructors
16 / 23 / 0	M/W/F 8:45 AM - 9:50 AM 1/10/2022 - 3/3/2022	Main Campus, Chapman Hall 04 Lecture	Katherine Ritchey (**Lecture**)

MTH-100-02
Intermediate Algebra
Runs from 1/10/2022 - 3/3/2022

Seats	Times	Locations	Instructors
8 / 23 / 0	M/W/F 10:00 AM - 11:05 AM 1/10/2022 - 3/3/2022	Main Campus, Kolenbrander Harter Info Cntr 112 Lecture	Fred Dawson (**Lecture**)

MTH-100-03
Intermediate Algebra
Runs from 1/10/2022 - 3/3/2022

Seats	Times	Locations	Instructors
5 / 23 / 0	M/W/F 11:15 AM - 12:20 PM 1/10/2022 - 3/3/2022	Main Campus, Kolenbrander Harter Info Cntr 013 Lecture	Sherri Brugh (**Lecture**)

MTH-105 College Algebra (2 Credits)

A study of exponents and polynomials, factoring, rational expressions, and quadratic equations intended to better prepare the student for higher levels of mathematics. May not be taken after credit is granted for MTH 140 or above except for change of grade. Prerequisite: MTH 100 with a grade of C- or higher, or satisfactory math placement. 2 Semester Hours.

Requisites:
Take MTH 100 with a minimum grade of C- or math placement of Level B. - Must be completed prior to taking this course.
Locations:
Main Campus, Acadeum - College Consortium

MTH-119 Quantitative Literacy (4 Credits)

This course will provide and enhance student skills in quantitative methods, reasoning, and problem solving. Topics included are from an array of real-world applicable mathematics including data analysis, probability, financial literacy, voting theory, and graph theory. Students are expected to learn and use basic methods of computation as well as be able to draw conclusions and interpret their results. 4 Semester Hours.

Requisites:
None
Locations:

Main Campus, Acadeum - College Consortium

MTH-123 Elementary Statistics (4 Credits)

A study of measures useful in giving concise descriptions of masses of numerical data. A brief study of probability theory provides the basis for an introduction to methods of testing hypotheses and measuring the confidence with which conclusions may be drawn by sampling. Historical developments of statistics and probability will be explored as will applications in various fields. Prerequisite: MTH 105 with a grade of C- or higher, or satisfactory math placement. 4 Semester Hours.

Requisites:
Take MTH-105 with a minimum grade of C- or math placement of Level C. - Must be completed prior to taking this course.
Locations:
Main Campus, Acadeum - College Consortium

MTH-125 Elementary Discrete Math (4 Credits)

An introduction to discrete mathematics. Topics include logic and proof, sequences and sets, recurrence relations, elementary probability, functions, mathematical induction, recurrence relations, graphs and trees, and matrix manipulation. Prerequisite: MTH 105 with a grade of C- or higher, or satisfactory math placement. 4 Semester Hours.

Requisites:
Take MTH-105 with a minimum grade of C- or math placement of Level C. - Must be completed prior to taking this course.

MTH-130 Calculus Lab (1 Credits)

Provides co-requisite support for students while they are enrolled in MTH 141 Calculus I. Emphasis will be placed on skills needed for calculus, with just-in-time review of algebra, trigonometry, and logarithms. May not be taken after credit is granted for MTH 141 except for change of grade. S/U. Prerequisite: Satisfactory math placement. Co-requisite: MTH 141. 1 Semester Hour.

Requisites:
Take MTH-141 - Must be taken at the same time as this course.
Math placement of Level D. - Must be completed prior to taking this course.
Locations:
Main Campus

MTH-223 Intermediate Statistics (4 Credits)

This second course in statistics will emphasize statistical computation and applications in various fields, modeling, and visualization for real data sets. Topics include multiple regression with diagnostics, one-way and multi-way analysis of variance, and analysis of categorical data. Prerequisites: MTH 123 or MTH 200, or permission of instructor for students who have had exposure to statistical hypothesis testing. 4 Semester Hours.

Requisites:
Take MTH-123 or MTH-200 - Must be completed prior to taking this course.

MTH-305 Prob and Stats for Enginerring (2 Credits)

This course provides an introduction to the use of probability and statistics in engineering. Topics include descriptive statistics, simple regression, probability, continuous probability distributions, point estimation, confidence intervals, hypothesis tests, and risk assessment. Prerequisite: MTH 142. 2 Semester Hours.

Requisites:
Take MTH-142 - Must be completed prior to taking this course.

MTH-306 Prob and Stats Engineering Sci (4 Credits)

This course provides the theory and practice of the use of probability and statistics in engineering and science. Topics include descriptive statistics, probability, discrete and continuous probability distributions, estimation and confidence intervals, hypothesis tests, risk assessment, Monte Carlo methods, correlation and regression, analysis of variance, and design of experiments. An applied group project is required in which experimental design, data collection, and computer analysis of data are utilized. Prerequisite: MTH 142. 4 Semester Hours.

MTH-460 Senior Seminar (1 to 2 Credits)

This course will be taken with one of the following topics of emphasis: Mathematics Education, Pure Mathematics, Applied Mathematics, Statistics, or Financial Mathematics. This course is required of all mathematics and financial mathematics majors. This course has as its requirements the completion of a senior research project which will be communicated to the department in either a poster or a presentation, and a research paper. A total of two credits must be completed in one or both semesters of the senior year. Prerequisites: Mathematics or financial mathematics major with senior standing, or permission of the instructor. 1-2 Semester Hours.
