MTH-100 Intermediate Algebra (2 Credits)

A study of the real number system, linear equations and inequalities, and systems of linear equations and inequalities intended to better prepare the student for higher levels of mathematics. May not be taken after credit is granted for MTH 105 or above except for change of grade. 2 Semester Hours.

Requisites:
None
Locations:
Main Campus, Acadeum - College Consortium

2023 Spring

MTH-100-01
Intermediate Algebra
Runs from 1/9/2023 - 3/2/2023

Seats	Times	Locations	Instructors
3 / 24 / 0	M/W/F 8:45 AM - 9:50 AM 1/9/2023 - 3/2/2023	Main Campus, Kolenbrander Harter Info Cntr 002 Lecture	Fred Dawson (**Lecture**)

MTH-100-02
Intermediate Algebra
Runs from 1/9/2023 - 3/2/2023

Seats	Times	Locations	Instructors
3 / 24 / 0	M/W/F 10:00 AM - 11:05 AM 1/9/2023 - 3/2/2023	Main Campus, Kolenbrander Harter Info Cntr 002 Lecture	Katherine Ritchey (**Lecture**)

MTH-100-03
Intermediate Algebra
Runs from 3/13/2023 - 5/10/2023

Seats	Times	Locations	Instructors
8 / 20 / 0	3/13/2023 - 5/10/2023	Main Campus, Online ONLINE Online	Douglas Henry (**Online**)

MTH-105 College Algebra (2 Credits)

A study of exponents and polynomials, factoring, rational expressions, and quadratic equations intended to better prepare the student for higher levels of mathematics. May not be taken after credit is granted for MTH 140 or above except for change of grade. Prerequisite: MTH 100 with a grade of C- or higher, or satisfactory math placement. 2 Semester Hours.

Requisites:
Take MTH 100 with a minimum grade of C- or math placement of Level B. - Must be completed prior to taking this course.
Locations:
Main Campus, Acadeum - College Consortium

2023 Spring

MTH-105-02
College Algebra
Runs from 3/13/2023 - 5/10/2023

Seats	Times	Locations	Instructors
5 / 24 / 0	M/W/F 8:45 AM - 9:50 AM 3/13/2023 - 5/10/2023	Main Campus, Kolenbrander Harter Info Cntr 002 Lecture	Fred Dawson (**Lecture**)

MTH-105-03
College Algebra
Runs from 3/13/2023 - 5/10/2023

Seats	Times	Locations	Instructors
2 / 24 / 0	M/W/F 10:00 AM - 11:05 AM 3/13/2023 - 5/10/2023	Main Campus, Kolenbrander Harter Info Cntr 203 Lecture	Fred Dawson (**Lecture**)

MTH-119 Quantitative Literacy (4 Credits)

This course will provide and enhance student skills in quantitative methods, reasoning, and problem solving. Topics included are from an array of real-world applicable mathematics including data analysis, probability, financial literacy, voting theory, and graph theory. Students are expected to learn and use basic methods of computation as well as be able to draw conclusions and interpret their results. 4 Semester Hours.

Requisites:
None
Locations:
Main Campus, Acadeum - College Consortium

MTH-123 Elementary Statistics (4 Credits)

A study of measures useful in giving concise descriptions of masses of numerical data. A brief study of probability theory provides the basis for an introduction to methods of testing hypotheses and measuring the confidence with which conclusions may be drawn by sampling. Historical developments of statistics and probability will be explored as will applications in various fields. Prerequisite: MTH 100 with a grade of C- or higher, or satisfactory math placement. 4 Semester Hours.

Requisites:
Take MTH-100 with a minimum grade of C- or math placement of Level C. - Must be completed prior to taking this course.
Locations:
Main Campus, Acadeum - College Consortium

MTH-125 Elementary Discrete Math (4 Credits)

An introduction to discrete mathematics. Topics include logic and proof, sequences and sets, recurrence relations, elementary probability, functions, mathematical induction, recurrence relations, graphs and trees, and matrix manipulation. Prerequisite: MTH 105 with a grade of C- or higher, or satisfactory math placement. 4 Semester Hours.

Requisites:
Take MTH-105 with a minimum grade of C- or math placement of Level C. - Must be completed prior to taking this course.
Locations:
Main Campus, Acadeum - College Consortium

MTH-140 Precalculus Mathematics (4 Credits)

A study of topics needed to prepare a student for calculus including polynomial, exponential, and logarithmic functions, graphs, quadratic equations and inequalities, and selected topics from analytic geometry and trigonometry. May not be taken after credit is granted for MTH 141 except for change of grade. Prerequisite: MTH 105 with a grade of C- or higher, or satisfactory math placement. 4 Semester Hours.

Requisites:
Take MTH-105 with a minimum grade of C- or math placement of Level C. - Must be completed prior to taking this course.

MTH-141 Calculus I (4 Credits)

A study of limits, continuity, differentiation, and an introduction to the indefinite and definite integrals. Includes applications to optimization problems, related rates and the Fundamental Theorem of Calculus. May not be taken after credit is granted for MTH 142 except for change of grade. Prerequisites: MTH 140 with a grade of C- or higher or satisfactory math placement for MTH 141. 4 Semester Hours.

Requisites:
Take MTH-140 with minimum grade of C- or math placement of Level D. - Must be completed prior to taking this course.
Locations:
Main Campus, Acadeum - College Consortium

MTH-205 Intro to Probability and Stats (2 Credits)

This course provides an introduction to the use of probability and statistics in engineering. Topics include descriptive statistics, simple regression, probability, continuous probability distributions, point estimation, confidence intervals, hypothesis tests, and risk assessment. Prerequisite: MTH-142. 2 Semester Hours.

Requisites:
Take MTH-142 - Must be completed prior to taking this course.
Locations:
Main Campus

Runs from 1/9/2023 - 3/2/2023

Seats	Times	Locations	Instructors
10 / 26 / 0	M/W/F 12:30 PM - 1:35 PM 1/9/2023 - 3/2/2023	Main Campus, Kolenbrander Harter Info Cntr 003 Lecture	David Gothard (**Lecture**)

MTH-206 Probability and Stats Engineer (4 Credits)

This course provides the theory and practice of the use of probability and statistics in engineering and science. Topics include descriptive statistics, probability, discrete and continuous probability distributions, estimation and confidence intervals, hypothesis tests, risk assessment, Monte Carlo methods, correlation and regression, analysis of variance, and design of experiments. An applied group project is required in which experimental design, data collection, and computer analysis of data are utilized. Prerequisite: MTH-142. 4 Semester Hours.

Requisites:
Take MTH-142 - Must be completed prior to taking this course.

MTH-223 Intermediate Statistics (4 Credits)

This second course in statistics will emphasize statistical computation and applications in various fields, modeling, and visualization for real data sets. Topics include multiple regression with diagnostics, one-way and multi-way analysis of variance, and analysis of categorical data. Prerequisites: MTH 123 or MTH 200, or permission of instructor for students who have had exposure to statistical hypothesis testing. 4 Semester Hours.

Requisites:
Take MTH-123 or MTH-200 - Must be completed prior to taking this course.
Locations:
Main Campus

MTH-333 Linear Algebra Diff Equation (4 Credits)

An introduction to the principal ideas and methods in linear algebra and differential equations. Some of the topics include systems of linear equations, matrices and determinants, vector spaces, eigenvalues and eigenvectors, linear differential equations, system of differential equations, and applications. Prerequisite: MTH-142 with a grade of C- or better. MTH 333 cannot be taken if credit has already been earned in both MTH 322 and MTH 335. 4 Semester Hours.

Requisites:
Take MTH-142 with a minimum grade of C- - Must be completed prior to taking this course.
Locations:
Main Campus, Acadeum - College Consortium

MTH-351 Numerical Analysis (2 Credits)

A study of numerical integration and the numerical solution of differential equations, numerical methods of linear algebra, matrix inversion and the solving for real roots of equations. Oriented toward computation using computers. Typically offered in the fall semester of even-numbered years. Prerequisites: MTH 333 or MTH 322 or MTH 335. A computer programming course such as CSC 220 is recommended. 2 Semester Hours.

Requisites:
Take MTH-333 or MTH-322 or MTH-335 - Must be completed prior to taking this course.
A computer programming course such as CSC 220 is recommended. - Recommended prior to taking this course, but is not required.

MTH-460 Senior Seminar (1 to 2 Credits)

This course will be taken with one of the following topics of emphasis: Mathematics Education, Pure Mathematics, Applied Mathematics, Statistics, or Financial Mathematics. This course is required of all mathematics and financial mathematics majors. This course has as its requirements the completion of a senior research project which will be communicated to the department in either a poster or a presentation, and a research paper. A total of two credits must be completed in one or both semesters of the senior year. Prerequisites: Mathematics or financial mathematics major with senior standing, or permission of the instructor. 1-2 Semester Hours.

Requisites:
None
Locations:
Main Campus
