MTH-100 Intermediate Algebra (2 Credits)

A study of the real number system, linear equations and inequalities, and systems of linear equations and inequalities intended to better prepare the student for higher levels of mathematics. May not be taken after credit is granted for MTH 105 or above except for change of grade. 2 Semester Hours.

Requisites:
None
Locations:
Main Campus

2022 Fall

MTH-100-01 Interm
Runs from 8/22/2022 - 10/13/2022

Seats	Times	Locations	Instructors
0 / 24 / 0	M/W/F 8:45 AM - 9:50 AM 8/22/2022 - 10/13/2022	Main Campus, Chapman Hall 104 Lecture	Gerald J. Wuchter (**Lecture**)

MTH-100-02 Interm
Runs from 8/22/2022 - 10/13/2022

Seats	Times	Locations	Instructors
0 / 24 / 0	M/W/F 10:00 AM - 11:05 AM 8/22/2022 - 10/13/2022	Main Campus, Kolenbrander Harter Info Cntr 012 Lecture	David Gothard (**Lecture**)

MTH-100-03 Interm
Runs from 8/22/2022 - 10/13/2022

Seats	Times	Locations	Instructors
1 / 24 / 0	M/W/F 11:15 AM - 12:20 PM 8/22/2022 - 10/13/2022	Main Campus, Kolenbrander Harter Info Cntr 002 Lecture	Fred Dawson (**Lecture**)

MTH-100-04 Interm
Runs from 10/18/2022 - 12/15/2022

Seats	Times	Locations	Instructors
11 / 24 / 0	M/W/F 10:00 AM - 11:05 AM	Main Campus, Kolenbrander	Fred Dawson (**Lecture**)

Seats	Times	Locations	Instructors
	10/18/2022 - 12/15/2022	Harter Info Cntr 002 Lecture	

MTH-105 College Algebra (2 Credits)

A study of exponents and polynomials, factoring, rational expressions, and quadratic equations intended to better prepare the student for higher levels of mathematics. May not be taken after credit is granted for MTH 140 or above except for change of grade. Prerequisite: MTH 100 with a grade of C- or higher, or satisfactory math placement. 2 Semester Hours.

Requisites:
Take MTH 100 with a minimum grade of C- or math placement of Level B. - Must be completed prior to taking this course.
Locations:
Main Campus, Acadeum - College Consortium

MTH-119 Quantitative Literacy (4 Credits)

This course will provide and enhance student skills in quantitative methods, reasoning, and problem solving. Topics included are from an array of real-world applicable mathematics including data analysis, probability, financial literacy, voting theory, and graph theory. Students are expected to learn and use basic methods of computation as well as be able to draw conclusions and interpret their results. 4 Semester Hours.

Requisites:
None
Locations:
Main Campus, Acadeum - College Consortium

MTH-123 Elementary Statistics (4 Credits)

A study of measures useful in giving concise descriptions of masses of numerical data. A brief study of probability theory provides the basis for an introduction to methods of testing hypotheses and measuring the confidence with which conclusions may be drawn by sampling. Historical developments of statistics and probability will be explored as will applications in various fields. Prerequisite: MTH 105 with a grade of C- or higher, or satisfactory math placement. 4 Semester Hours.

Requisites:
Take MTH-105 with a minimum grade of C- or math placement of Level C. - Must be completed prior to taking this course.
Locations:
Main Campus, Acadeum - College Consortium

MTH-140 Precalculus Mathematics (4 Credits)

A study of topics needed to prepare a student for calculus including polynomial, exponential, and logarithmic functions, graphs, quadratic equations and inequalities, and selected topics from analytic geometry and trigonometry. May not be taken after credit is granted for MTH 141 except for change of grade. Prerequisite: MTH 105 with a grade of C- or higher, or satisfactory math placement. 4 Semester Hours.

Requisites:
Take MTH-105 with a minimum grade of C- or math placement of Level C. - Must be completed prior to taking this course.

MTH-141 Calculus I (4 Credits)

A study of limits, continuity, differentiation, and an introduction to the indefinite and definite integrals. Includes applications to optimization problems, related rates and the Fundamental Theorem of Calculus. May not be taken after credit is granted for MTH 142 except for change of grade. Prerequisites: MTH 140 with a grade of C- or higher or satisfactory math placement for MTH 141. 4 Semester Hours.

Requisites:
Take MTH-140 with minimum grade of C- or math placement of Level D. - Must be completed prior to taking this course.

MTH-302 College Geometry and History (4 Credits)

An informal introduction to the concepts and principles of Euclidean geometry in two and three dimensions. Geometric software will be used to explore geometric ideas and their applications in real-world contexts. Topics will include the history of mathematics from antiquity through the present time. Contributions by various individuals and cultures will be examined. Both European and non-European mathematical developments will be explored, with an emphasis on the interrelationship between mathematics and the culture of the time. Typically offered in the fall semester of even-numbered years. Prerequisite: MTH 142. 4 Semester Hours.

Requisites:
Take MTH-142 - Must be completed prior to taking this course.
Locations:
Main Campus

MTH-333 Linear Algebra Diff Equation (4 Credits)

An introduction to the principal ideas and methods in linear algebra and differential equations. Some of the topics include systems of linear equations, matrices and determinants, vector spaces, eigenvalues and eigenvectors, linear differential equations, system of differential equations, and applications. Prerequisite: MTH 142 with a grade of C- or better. 4 Semester Hours.

Requisites:

MTH-335 Differential Equations (4 Credits)

A study of the theory and techniques of the solution of ordinary differential equations with applications in the sciences. Topics will include separable, first-order linear, exact and homogeneous equations. Methods will include the use of integrating factors, the method of undetermined coefficients, variation of parameters, and Laplace Transforms. Prerequisite: MTH 142 with a C- or better. MTH 335 cannot be taken after credit has been given for MTH 333. 4 Semester Hours.

MTH-460 Senior Seminar (1 to 2 Credits)

This course will be taken with one of the following topics of emphasis: Mathematics Education, Pure Mathematics, Applied Mathematics, Statistics, or Financial Mathematics. This course is required of all mathematics and financial mathematics majors. This course has as its requirements the completion of a senior research project which will be communicated to the department in either a poster or a presentation, and a research paper. A total of two credits must be completed in one or both semesters of the senior year. Prerequisites: Mathematics or financial mathematics major with senior standing, or permission of the instructor. 1-2 Semester Hours.

Requisites:
None
